## AZGPS Small Survey Services

---

### About AZGPS

Based in Florence, Arizona, AZGPS provides professional land surveying and GNSS control services built on modern technology and decades of field experience. Our mission is to deliver accurate, efficient, and ready-to-design data for property owners, contractors, and engineers across Central Arizona.

### Core Services

- Boundary Surveys – Re-establishing property corners, easements, and legal descriptions.
- Topographic Surveys – Ground and surface mapping for site design, grading, and drainage.
- Construction Staking – Layout of foundations, utilities, and improvements from design plans.
- Control & GPS Networks – Static, RTK, and CORS-based control for precise georeferencing.
- As-Built Documentation – Verification of installed improvements for record drawings or permits.

### Technology & Workflow

- Permanent GNSS CORS Tower
- Cloud-based data management for secure deliverables and version control
- Standard deliverables in DWG, DXF, PDF, and CSV formats

### Why Choose AZGPS

- Locally owned and operated by Travis Thompson, RLS
- Flexible scheduling for small residential or infill projects
- Quick turnaround with professional accuracy
